The Canadian Journal of Chemical Engineering — 1977

INDEX OF AUTHORS

Alessi, Paola and Kikic, Ireno — Liquid-Liquid Equilibrium for the Activity Coefficient Determination: Effect of Mutual Solubility Between Binary Systems and Auxiliary Solvents 78
Al Taweel A. M., Boyle, J., Gomaa, H. G., and Landau, J. — Comparison of Methods for Measuring Interfacial Areas in Gas-Liquid Dispersions 13
Ambegaonkar, Anil S., Dhruv, Ashok S., and Tavlarides, Lawrence L. — Fluid-Particle Hydrodynamics in Agitated Vessels 414
Angelino, H., et Delmas, H. — Contraction de bulles de vapeur non sphériques 644
Aruanno, Jorge and Wanke, Sieghard — Rates of Methanol Oxidation Over Thermally Treated Fe-Mo Oxide Catalysts 93
Baird, M. H. I., Loo, H. J., and Wairegi, T. — Velocity and Momentum of Vortex Rings in Relation to Formation Parameters 19
Bajramovic, R., and Reilly, Park M. — Explanation for an Apparent Failure of the Box-Hill Procedure for Model Discrimination, An 82
Bajramovic, R., Blau, G. E., Branson, D. R., Reilly P. M., and Sauerhoff, M. W. — Guidelines for the Optimal Design of Experiments to Estimate Parameters in First Order Kinetic Models 614
Bakhshi, N. N., Mathews, J. F., and Ranganathan, R. — Compensation Effect and its use in Catalyst Correlations 544
Balakrishnan, P. V. — A Radiochemical Technique for the Study of Dissolution of Corrosion Products in High-Temperature Water 357
Balakrishnan, P. V. — A Study of Phosphate Hide-Out from Boiling Water 592
Bank, Nader and Gauvin, W. H. — Measurements of Flow Characteristics in a Confined Vortex Flow 397
Bank, N. and Gauvin, W. H. — Inclined Hot-Wire Response Equations for a Flow Field Having a Dominant Tangential Velocity Component 516
Bataille, P., Huneault, R., Patterson, I., and Rollin, A. L. — The Effect of Flow Regime on the Continuous Emulsion Polymerization of Styrene in a Tubular Reactor 565
Baumeister, K. J., Chmieliewaki, C. E., and Schoessow, G. J. — Film Boiling of Mercury Droplets 521
Beeckmans, J. M., and Kim, C. J. — Analysis of the Efficiency of Reverse Flow Cyclones 640
Beeckmans, J. M., and Chan, E. W. — Effect of Orifice Shape on Air Atomized Water Spray Characteristics 637
Beeckmans, J. M., and Minh, T. — Separation of Mixed Granular Solids Using the Fluidized Counter-Current Cascade Principle 493
Beerli, M., Boucher, J. M., and Thérien, N. — Carbonisation de la tourbe pour l'élimination d'ions métalliques en solution aqueuse 192
Bennion, D. W., and Goss, M. J. — A Sinusoidal Pressure Response Method for Determining the Properties of Porous Medium and its In-Situ Fluid 113
Bernhard, A., Campagna, P., Piccinini, N., and Vallans, F. — Segregation Phenomenon in Spouted Beds 122
Berti, V., Iannibello, A., Marengo, S., Trifiro, F., and Villa, P. — Catalytic Properties of Molybdenum (VI) Chemisorbed on γ-Alumina in the Hydrotreating of Petroleum Residues 747
Bes, R., Lacoste, G., et Routie, R. — Séparation isotopique d'azote 15 par échange chimique: influence de la composition des gas de reflux dans le système NO (gaz.) N_2O_3 (liq.) 297
Blau, G. E. — See Bajramovic, R. 614
Bock, H. H. R., and Tennankore, K. N. — A Thermal Oscillator for Optimization of Control 422
Bott, T. R., and Gudmundsson, J. S. — Deposition of Paraffin Wax from Kerosene in Cooled Heat Exchanger Tubes 381
Bott, T. R., and Pinheiro, M. M. V. P. S. — Biological Fouling — Velocity and Temperature Effects 473
Boucher, J. M. — See Beerli, M. 192
Boyle, J. — See Al Taweel, A. M. 13
Boyle, Thomas J. — Control of Cross-Direction Variations in Web Forming Machines 457
Branson, D. R. — See Bajramovic, R. 614
Browne, Denis W., Ishii, Yoshikazu, and Otto, Fred D. — Solving Multicolumn Equilibrium Stage Operations by Total Linearization 307
Burrill, K. A. — Corrosion Product Transport in Water-Cooled Nuclear Reactors. Part 1: Pressurized Water Operation 54
Butt, M. A., Kumazama, H., Lozano, L. E., and Sada, E. — Interfacial Turbulence Accompanying Chemical Absorption 293
Butt, M. A., Kumazama, Hidehiro, and Sada, Eizo — Mass Transfer with Chemical Reaction in Both Phases 475
Butt, M. A., Kumazama, Hidehiro and Sada, Eizo — Gas Absorption with Complex Chemical Reaction: Approximate Analytical Solutions 623
Camp, F. W. — Processing Athabasca Tar Sands-Tailings Disposal 581
Campagna, P. — See Bernhard, A. 122
Capes, C. E., and Fouda, A. E. — Hydrodynamic Particle Volume and Fluidized Bed Expansion 386
Casademont, Ernest, Mahenc, Jean, and Sanchez, Victor — Fractionnement des mélanges de protéines électrophorèse convective 62
Chan, E. W. — See Beeckmans, J. M. 637
Chang, C. S., Uchida, S., and Wen, C. Y. — Mechanics of a Turbulent Contact Absorber 392
Charles, Michael E. — Fluid Mechanics and Resource Development 365
Chen, B. H., McMillan, A. F., and Wang, S. T. — Dispersion from a Point Source With and Without Chemical Reaction in Semi-Bounded Waters 43
Chen, T. S., and Mucoglu, A. — Analysis of Combined Forced and Free Convection Across a Horizontal Cylinder 265
Chen, T. Y., Fan, Liang-Shih, Fan, L. T., Miyanami, Kei., and Walawender, W. P. — A Mathematical Model for Pyrolysis of a Solid Particle. Effects of the Lewis Number 47
Cheng, K. C., and Wong, Sum-Lok — Liquid Solidification in a Convectively-Cooled Parallel-Plate Channel 149
Chida, T., and Ford, J. D. — Kinetics of Hydrogen Reduction of Nickel Sulfide 313
Chin, M., and Landau, J. — A Contactor for Studying Mass Transfer with Reaction in Liquid-Liquid Systems 161
Chintapalli, Prasad, Fisher, D. Grant, and Seborg, Dale E. — Model Reference Identification of State Space Models for a Double Effect Evaporator 213
Chmieliewski, C. E. — See Baumeister, K. J. 521
Choudhary, K. R., and Gentry, J. W. — A Model for Particle Collection with Potential Flow Between Two Parallel Cylinders 403
Chung, H. W., and Frazier, G. C. — Droplet Vaporization in Moderately High Temperature, Stationary Media 736
Chung, W. K., Kato, M., and Lu, B. C.-Y. — A

Generalized One-Parameter Redlich-Kwong Equation for Vapor-Liquid Equilibrium Calculations 701
Chung, W. K., and Lu, B. C.-Y. — On the Representation of Liquid Properties of Pure Polar Compounds by Means of a Modified Redlich-Kwong Equation of State 707
Coeuret, F., and Storck, A. — Wall to Liquid Mass Transfer in Fluidized Beds 427
Cohen, H., Gilath, Ch., and Wolf, D. — Flow Dynamics in Distillation Columns Packed with Dixon Rings as used in Isotope Separation 168
Cormack, D. E., Kenchington, John M., LeBlanc, Patrick J., and Phillips, Colin R. — Parameters and Mechanisms in the Solvent Extraction of Mined Athabasca Oil Sand 572
Couderc, J. P., and Riba, J. P. — Expansion de couches fluidisées par des liquides 118
Dealy, John M., Garcia-Rejoin, Andrés, and Kamal, Musa R. — Rheological Comparison of Three Polyethylene Film Resins 651

INDEX OF PAPERS

Analysis and Design of Binary Vapour-Liquid Equilibrium Experiments, The — Part I — Parameter Estimation and Consistency Tests — T. L. Sutton and J. F. MacGregor 602

Analysis and Design of Binary Vapour-Liquid Equilibrium Experiments, The — Part II — The Design of Experiments — J. F. MacGregor and T. L. Sutton 609

Analysis of Combined Forced and Free Convection Across a Horizontal Cylinder — A. Mucoglu and T. S. Chen 265

Analysis of the Efficiency of Reverse Flow Cyclones — J. M. Beeckmans and C. J. Kim 640

Analysis of the Transition Regime of Fibre Suspension Flow in Pipes, An — P. W. F. Lee and G. G. Duffy 361

Application of van't Hoff's Osmotic Pressure Equation to Aqueous Mixed Electrolyte Solutions — Tuong-Tu Tran and James Sangster 347

Approximate Mean Temperature Difference for Calculation of Heat Exchangers — S. Gasior, A. B. Jarzebski, A. I. Lachowski and T. Szponarski 741

Axial Dispersion in a Rectangular Bubble Column — G. J. Stiegel and Y. T. Shah 3

Biological Fouling — Velocity and Temperature Effects — T. R. Bott and M. M. V. P. S. Pinheiro 473

Bounds on the Steady State Concentration and Temperature in a Tubular Reactor — A. Varma 629

Bulk and Interfacial Physical Properties of Aqueous Solutions of Sodium Lauryl Sulphate and Lauryl Alcohol with Air and Benezen Systems: Part I — Aqueous Solutions of Sodium Lauryl Sulphate — H. Vaya, S. Vijayan and D. R. Woods 718

Carbonisation de la tourbe pour l'élimination d'ions métalliques en solution aqueuse — N. Therien, J. M. Boucher et M. Beerli 192

Catalytic Properties of Molybdenum (VI) Chemisorbed on γ-Alumina in the Hydrotreating of Petroleum Residues — V. Berti, A. Iannibello, S. Marengo, F. Trifiro and P. Villa 747

Comparison of Methods for Measuring Interfacial Areas in Gas-Liquid Dispersions — J. Landau, J. Boyle, H. G. Gomaa, and A. M. Al Taweel 13

Compensation Effect and its use in Catalyst Correlations — N. N. Bakhshi, J. F. Mathews and R. Ranganathan 544

Computation of Mass Transfer Rates at Rotating Cylindrical Electrodes with Wiper Blades, On the — M. Farooque and T. Z. Fahidy 355

Contactor for Studying Mass Transfer with Reaction in Liquid-Liquid Systems, A, — J. Landau and M. Chin 161

Continuous Multi-Particle Crystal Growth in Vertical Cones — Tsutomu Ishii, S. Fujita and A. I. Johnson 177

Contraction de bulles de vapeur non sphériques — H. Angelino et H. Delmas 644

Control of Cross-Direction Variations in Web Forming Machines — Thomas J. Boyle 457

Corrosion Product Transport in Water-Cooled Nuclear Reactors — Part I — Pressurized Water Operation — K. A. Burrill 54

Deposition of Paraffin Wax from Kerosene in Cooled Heat Exchanger Tubes — T. R. Bott and J. S. Gudmundsson 381

Desulfurization of Oil Sands Coke — B. S. Parmar and E. L. Tollefson 185

Diffusion in Tabletted Catalysts — S. H. Jury 538

Direct Contact Condensation from Air-Steam Mixtures on a Single Droplet — E. Kulic and E. Rhodes 131

Dispersion from a Point Source With and Without Chemical Reaction in Semi-Bounded Waters — S. T. Wang, A. F. McMillan and B. H. Chen 43

Droplet Vaporization in Moderately High Temperature, Stationary Media — H. W. Chung and G. C. Frazier 736

Effect of Alkalinity on the Scaling of Simulated Cooling Tower Water — Robert W. Morse and James G. Knudsen 272

Effect of Flow Regime on the Continuous Emulsion Polymerization of Styrene in a Tubular Reactor, The — A. L. Rollin, I. Patterson, R. Huneault and P. Bataille 565

Effect of Orifice Shape on Air Atomized Water Spray Characteristics — J. M. Beeckmans and E. W. Chan 637

Effect of Some Alkaline Additives on the Viscosity of Cool Water Slurries — J. Nurkowski and C. A. Shook 510

Effect of Turbulence on the Precision of Velocity and Velocity Fluctuation Data Obtained by Photochromic Visualization — Joseph A. C. Humphrey 126

Effects of Mixing, Temperature and Nutrient Concentration on the Fermentation of a Mixed Sugar Solution Simulating the Hexose Content of Waste Sulfite Liquor, The — G. Pineault, B. B. Pruden and H. Loutfi 333

Effects of Surface Active Agents on Fall Velocities of Drops — A. H. P. Skelland and Y-F Huang 240

Enhancement of Liquid Extraction by an Instantaneous Irreversible Reaction — J. W. Miller Jr. and D. O. Harper 534

Estimation of Thermo- and Diffusionphoretic Particle Deposition — P. J. Whitmore and A. Meisen 279

Etude de la déshydratation des éther de glycol comme une nouvelle voie de synthèse des vinyl-éthers — J. C. Salazar-Tello, L. Lena, R. Phan-Tan-Luu and J. Metzger 341

Etude des régimes d'évolution thermique de couches fluidisées gaz-solide mécaniquement agitées — H. Gibert and G. Rios 666

Etudes des paramètres d'opération du procédé de fermentation du d-glucose d-mannose et d-galactose — G. Pineault, B. B. Pruden et D. De Kee 197

Expansion Characteristics of Gas-Fluidized Beds — Thomas H. Hsiung and George Thodos 221

Expansion de couches fluidisées par des liquides — J. P. Riba et J. P. Couderc 118

Experimental Analysis of Particle Deposition on Single Collectors — R. Rajagopalan and Chi Tien 256

Experimental Study of Mass Transfer Due to an Impinging Rectangular Jet — Jacob H. Masliyah and Trung T. Nguyen 156

Experiments on the Residence-Time Distribution of Droplets in a Cocurrently Worked Spray Chamber —Q. T. Pham, and R. B. Keey 466

Explanation for an Apparent Failure of the Box-Hill Procedure for Model Discrimination, An — R. Bajramovic and Park M. Reilly 82

Exploratory Study of the Behaviour of Crude Oil Spills Under Ice, An — G. D. Greene, P. J. Leinonen and D. Mackay 696

Falling Film Evaporators — A Design Equation for Heat Transfer Rates — V. N. Murthy and P. K. Sarma 732

Film Boiling of Mercury Droplets — K. J. Baumeister, G. J. Schoessow and C. E. Chmielieski 521

Flow Boiling and Pool Boiling Critical Heat Flux in Water and Ethylene Glycol Mixtures — W. J. Frea, R. Knapp and T. D. Taggart 37

Flow Dynamics in Distillation Columns Packed with Dixon Rings as used in Isotope Separation — Ch. Gilath, H. Cohen, and D. Wolf 168

Fluid Flow and Heat Transfer in Internally Finned Helical Coils — Jacob H. Masliyah and K. Nandakumar 27

Fluid Mechanics and Resource Development — Michael E. Charles 365

Fluid-Particle Hydrodynamics in Agitated Vessels — Anil S. Ambegaonkar Ashok S. Dhruv and Lawrence L. Tavlarides 414

Foam Breaking — Key Process in Detoxification of Kraft Mill Effluents by Foam Separation — K. S. Ng, J. C. Mueller and C. C. Walden 439
Foam Fractionation of Zinc — Robert D. Siy and Frank D. Talbot 67
Forced Convention Film Boiling from a Horizontal Plate Subjected to an Arbitrarily Varying Wall Heat Flux — K. N. Seetharamu and M. V. Krishnamurthy 462
Fractionnement des mélanges de protéines par électrophorèse convective — Victor Sanchez, Ernest Casademont et Jean Mahenc 62
Freezing of Liquids in Turbulent Flow Inside Tubes — M. N. Ozisik and A. A. Shibani .....
Gas Absorption with Complex Chemical Reaction: Approximate Analytical Solutions — M. A. Butt, Hidehiro Kumazama and Eizo Sada 623
Generalized One-Parameter Redlich-Kwong Equation for Vapour-Liquid Equilibrium Calculations, A — W. K. Chung, M. Kato and B. C-Y Lu 701
Generalized Treatment for the Vapor Pressure Behavior of Polar and Hydrogen-Bonding Compounds — Mateo Gomez-Nieto and George Thodos 445
Guidelines for the Optimal Design of Experiments to Estimate Parameters in First Order Kinetic Models — P. M. Reilly, G. E. Blau, R. Bajramovic, D. R. Branson and M. W. Sauerhoff 614
Heat and Mass Transfer on a Stretching Sheet with Suction or Blowing — A. S. Gupta and P. S. Gupta 744
Heat Transfer to Laminar Flow with Temperature — Dependent Heat Generation — S. Mori, T. Inoue and A. Tanimoto 138
History and Status of Research in Fouling of Heat Exchangers in Cooling Water Service, The —J. W. Suitor, W. J. Marner, and R. B. Ritter 374
Hydrodynamic Particle Volume and Fluidized Bed Expansion — A. E. Fouda, and C. E. Capes 386
Inclined Hot-Wire Response Equations for a Flow Field Having a Dominant Tangential Velocity Component — N. Bank, and W. H. Gauvin 516
Interfacial Turbulence Accompanying Chemical Absorption — E. Sada, H. Kumazama, M. A. Butt, and J. E. Lozano 293
Kinetic Parameters of Isotopic Exchange Reaction in Finite Bath — Ting-Chia Huang, and Fuan-Nan Tsai 301
Kinetics of Hydrogen Reduction of Nickel Sulfide — T. Chida, and J. D. Ford 313
Leaching of a Chalcopyrite Concentrate in Ammonia — I. G. Reilly, and D. S. Scott 527
Liquid-Liquid Equilibrium for the Activity Coefficient Determination: Effect of Mutual Solubility Between Binary Systems and Auxiliary Solvents— Ireno Kikic and Paolo Alessi 78
Liquid-Liquid Symmetry and Critical Constants in Regular Solutions — S. R. Lombardo and R. W. Missen 753
Liquid Solidification in a Convectively-Cooled Parallel-Plate Channel — K. C. Cheng and Sum-Lok Wong 149
Mass Transfer and Hydrodynamic Characteristics of Gas Inducing Type of Agitated Contactors — J. B. Joshi and M. M. Sharma 683
Mass Transfer by Free Convection During Electrolysis at Inclined Electrodes — M. A. Patrick, A. A. Wragg and D. M. Pargeter 432
Mass Transfer with Chemical Reaction in Both Phases — Eizo Sada, Hidehiro Kumazawa and M. A. Butt 475
Mathematical Model for Pyrolysis of a Solid Particle — Effects of the Lewis Number, A — L. T. Fan, Liang-Shih Fan, Kei Miyanami, T. Y. Chen and W. P. Walawender 47
Mathematical Model for Pyrolysis of a Solid Particle, A. — Effects of the Heat of Reaction — Kei Miyanami, Liang-Shih Fan, L. T. Fan, and W. P. Walawender 317
Measurement and Prediction of the Solubility of Acid in Gases in Monoethanolamine Solutions at Low Partial Pressures, The — A. E. Mather, and P. Nasir 715
Measurements of Flow Characteristics in a Confined Vortex Flow — Nader Bank, and W. H. Gauvin 397
Mechanics of a Turbulent Contact Absorber — S. Uchida, C. S. Chang, and C. Y. Wen 392
Micromixing Efficiency in Continuous Tank Mixers— Coasta Paolo, and Lodi Giorgio 477
Mixing, Diffusion and Chemical Reaction in an Unpremixed Feedstream Reactor — B. W. Ritchie and A. H. Tobgy 480
Model for Particle Collection with Potential Flow Between Two Parallel Cylinders, A — K. R. Choudhary and J. W. Gentry 403
Model Reference Identification of State Space Models for a Double Effect Evaporator — Prasad Chintapalli, Dale E. Seborg and D. Grant Fisher 213
Modelling of Commercial Oxidation Reactors Accounting for Mass Transfer Effects — D. A. Palmer 626
Modified Heil-Prausnitz Equation for Excess Gibbs Energy, A — Alessandro Vetere 70
Oxidation of Ortho-xylene on Vanadium Pentoxide Catalysts I, The — T. W. Hoffman and M. S. Wainwright 552
Oxidation of Ortho-xylene on Vanadium Pentoxide Catalysts II, The — The Influence of Catalyst Support Material on Product Distribution — M. S. Wainwright and T. W. Hoffman 557
Parameters and Mechanisms in the Solvent Extraction of Mined Athabasca Oil Sand — D. E. Cormack, J. M. Kenchington, C. R. Phillips, and P. J. LeBlanc 572
Performance Characteristics of Annular Fixed and Expanded Beds — K. Kasthuri and G. S. Laddha 87
Processing Athabasca Tar Sands — Tailings Disposal — F. W. Camp 581
Radiochemical Technique for the Study of Dissolution of Corrosion Products in High-Temperature Water, A — P. V. Balakrishnan 357
Rates of Methanol Oxidation Over Thermally Treated Fe-Mo Oxide Catalysts — Jorge Aruanno and Sieghard Wanke 93
Réacteur d'oxydation photocatalytique hétérogène — P. Witier, L. Estaque, P. C. Roberge et S. Kaliaguine 352
Reduced Dynamic Model of a Fixed Bed Reactor — C. McGreavy and H. M. Naim 326
Removal of Anionic Surfactant from its Dilute Aqueous Solution by use of Simple, Stripping and Enriching Modes (DBSNa-Water System), The — Katauyuki Kubota, Akira Yasui and Shinya Hayashi 96
Removal of Cationic Metal from Its Dilute Aqueous Solutions by Use of Foam Separation Technique — Experimental Surface Excess Equilibrium Relationships for Mg-DBSNa-Water System, The — Katsuyuki Kubota, Hiroshi Kawanoue and Shinya Hayashi 101
Removal of Sodium, Cadmium and Chromium Ions from Dilute Aqueous Solutions using Foam Fractionation, The — Katsuyuki Kubota and Shinya Hayashi 286
Representation of Liquid Properties of Pure Polar Compounds By Means of a Modified Redlich-Kwong Equation of State, On the — W. K. Chung, and B. C-Y. Lu .....
Rheological Comparison of Three Polyethylene Film Resins — John M. Dealy, Andrés Garcia-Rejon and Musa R. Kamal 651
Rheology and Aging Characteristics of Sodium Carboxymethylcellulose Solutions, The — S. C. Naik, J. C. Lee and J. F. Richardson 90
Rising Behavior of Air Bubbles in Superposed Liquid Layers — Yasuhiko H. Mori, Kazunari Komotori, Kazuya Higeta and Jungi Inada 9
Salt Effect in Distillation: A Literature Review II— William F. Furter 229
Second Virial Coefficients of Polar Gases for a Four-Parameter Model — Hang-Huei Lin, and L. I. Stiel 597
Segregation Phenomenon in Spouted Beds — N. Piccinini, A. Bernhard, P. Campagna and F. Vallana 122
Séparation isotopique d'azote 15 par échange chimique: influence de la composition des gaz de reflux dans le système NO (gaz) — N_2O_3 (liq.) — G. Lacoste, R. Bes, et R. Routie 297
Separation of Mixed Granular Solids Using the Fluidized Counter-Current Cascade Principle — J. M. Beeckmans and T. Minh 493
Simple Method for Estimation of Thermodynamic Properties of Concentrated and Supersaturated Aqueous Solutions of NaCl and KCl — Juan H. Vera 484

Simple Model to Calculate the Solubility of Liquid Water in Compressed Air, A — L. Marreilli and R. De Santis 450
Simple Three-Parameter Equation of State with Critical Compressibility Factor Correlation, A — Csaba Horvath and Hung-Jye Lin 246
Simple Collector Analysis of Collection Mechanism in Water Filtration — R. Rajagopalan and Chi Tien 113
Sinusoidal Pressure Response Method for Determining the Properties of Porous Medium and its In-Situ Fluid, A — D. W. Bennion and M. J. Goss 751
Solubility of H_2S and CO_2 in Propylene Carbonate Solvent — E. E. Isaacs, A. E. Mather and F. D. Otto 210
Solubility of Mixtures of Carbon Dioxide and Hydrogen Sulphide in an Aqueous DIPA Solution, The — E. E. Isaacs, F. D. Otto and A. E. Mather 307
Solving Multicolumn Equilibrium Stage Operations by Total Linearization — Denis W. Browne, Yoshikazu Ishii and Fred D. Otto 502
Spherical Agglomeration in a Conical Drum — B. D. Sparks and F. W. Meadus 506
Startup of a Pipeline Containing Settled Solid Particles — J. Peters, A. Salazar and C. A. Shook 592
Study of Phosphate Hide-Out from Boiling Water — P. V. Balakrishnan 105
Suitability of Cast Sodium Sulfate for Thermal Energy Storage — Arun Verma, and Yuhnan J. Hu 497
Theory for Predicting the Maximum Spoutable Height in a Spouted Bed, A — H. Littman, M. H. Morgan III, D. V. Vuković, F. K. Zdanski and Z. B. Grbavčić 422
Thermal Oscillator for Optimization of Control, A — K. N. Tennankore and H. H. R. Bock 655
Three-Parameter Markov Model for Sedimentation, A — E. M. Tory and D. K. Pickard 471
Two-Phase Flow Through Fractures in Porous Media —J. T. Ryan and G. Neale 408
Unsteady Flow of a Micro-Polar Fluid Between Two Concentric Circular Cylinders — H. Ramkissoon and S. R. Majumdar 145
Variable Eigenvalue Approach to the Solution of Phase-Change Problems, A — M. N. Ozisik and S. I. Guceri 19
Velocity and Momentum of Vortex Rings in Relation to Formation Parameters — M. H. I Baird, T. Wairegi and H. J. Loo 203
Viscosity of Organic Liquids at Elevated Temperatures and the Corresponding Vapour Pressures — M. S. Medani ano M. A. Hasan 427
Wall to Fluid Mass Transfer in Fluidized Beds —A. Storck and F. Coeuret 678
Water Droplet Vaporization in Humid Atmosphere — G. C. Frasier 761

THE EDITORS ARE GRATEFUL TO THE FOLLOWING REVIEWERS FOR THEIR ASSISTANCE THROUGH THE PERIOD OCTOBER 1, 1976 TO SEPTEMEBER 30, 1977
